CLINICIAN SIGNATURE

DATE OF REPORT

19th August 2022
10th to 19th August

PHYSICIAN NAME

NPI - PRESCRIBING NUMBER

PHYSICIAN SIGNATURE

PATIENT

KATE SMITH

AGE
63 years old

HEIGHT
5ft 9in

WEIGHT
163 lbs

RIGHT LEG BELOW KNEE

KNEE
-

AGE OF COMPONENT
-

PATIENT BACKGROUND

The patient is currently employed and in need of getting a new prosthetic device, in order to be able of performing her role.

YEARS USING A PROSTHESIS
40

SOCKET AGE
2 years

FOOT
ECHELON

SUSPENSION
PASSIVE SUCTION WITH SEALING SLEEVE

AGE OF COMPONENT
13TH OF JUNE 2022

AGE OF COMPONENT
13TH OF JUNE 2022

CLINICAL EVALUATION

CLINICIAN RECOMMENDATION

K-2

User has been rated a K-2 functional level or Limited Community Ambulator status characterized by

- Ability or potential to traverse low level environmental barriers
- Curbs, Small sets of stairs, ADA compliant ramps
- Ambulate in community at fixed cadence
- May require wheelchair for greater distances

IN CLINIC TESTS

AMPPRO

K-2

35 out of 47
10th of August 2022

PLUS-M™

46.4

Amputee reports higher mobility than 36.1% of the PLUS-M development sample.

10th of August 2022

TIMED UP AND GO

18.08 SEC

For lower limb amputees, a result equal to or greater than 19 sec is indicative of fall risk.

ACTIVITY EVALUATION

MOTIO K-LEVEL

3.7

A Suggested K level based off metrics calculated after acquisition period. Takes into account Overall Energy expenditure, cadence variability and activity performance over 10-day period.

ENERGY EXPENDITURE SCORE

4.56

The Energy Expenditure Score takes into account Kcals burned during each day of the acquisition period and provides an overall score for energy expended.

PEAK PERFORMANCE SCORE

4.04

The Peak Performance Score is representative highest 30 minutes of continuous activity recorded within the acquisition period. This Score is provided based on the best step and cadence metrics during the 30-minute timeframe.

CADENCE VARIABILITY SCORE

4.26

The Cadence Variability Score reflects the patient's ability to ambulate at various cadences. The score predicts the users likelihood vary cadence based of data accumulated throughout acquisition.
